Engineered and Built to O.E. Specifications

Fan clutches operate at different speeds and temperatures and testing must be performed at every level of operation. Critical performance aspects of a fan clutch include engagement temperature, disengagement temperature, fan speed, disengagement RPM, engagement RPM and torque. NAPA® Temp Products takes the time to measure each of these critical performance indicators for every O.E. fan clutch we test. This level of commitment delivers a part that will match O.E. performance in every facet.

240+
SKUs

More than 240 SKUs
covering 73M VIO

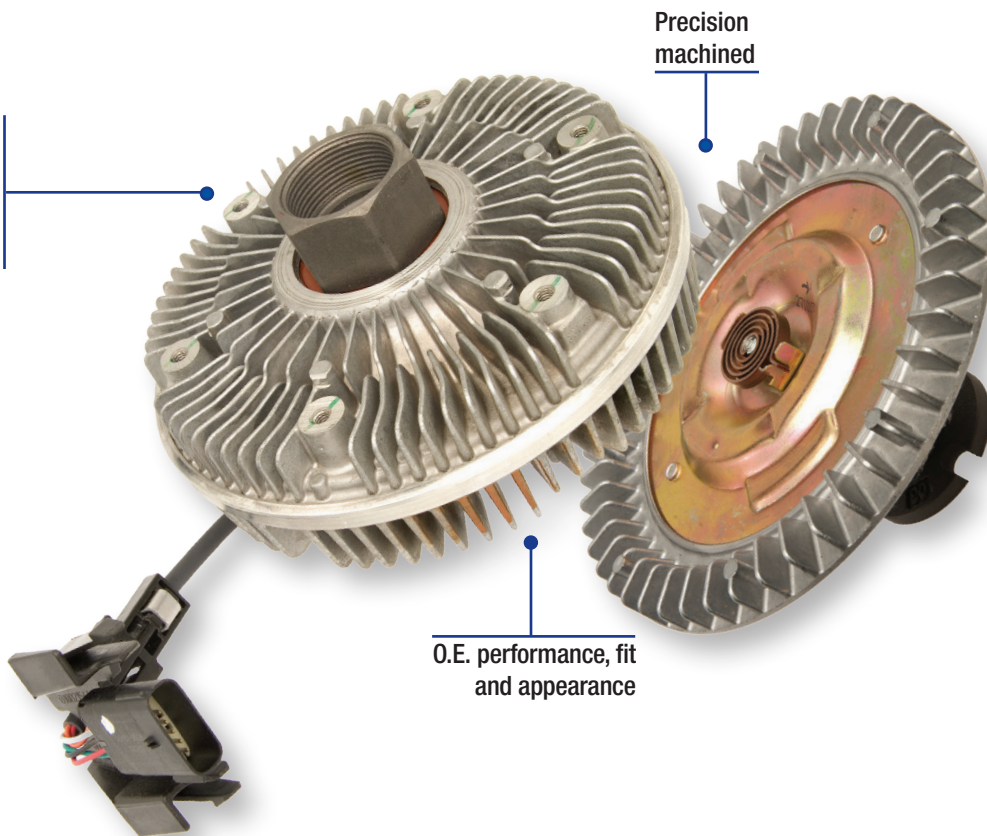

The most comprehensive line in the
aftermarket continues to expand

100%
VALIDATED

All fan clutches are designed and
engineered per application
